

REMARKS/ARGUMENTS

The disclosure was objected to because of the following informalities:

(1) A numeral should be given to the casing in Figs. 2 and 8b and described in the specification; and

(2) The Access-Control Circuit should be described in the specification.

Reconsideration of the objection is respectfully requested.

The specification has been amended to give a numeral to the casing in Figs. 2 and 8b, in accordance with the requirement of the Examiner, and replacement drawing sheets for Figs. 2 and 8b containing the necessary numerals for the casing are enclosed herewith..

Regarding the Examiner's allegation that the Access-Control Circuit should be described in the specification, it is respectfully submitted that the Access-Control Circuit has already been described in the specification.

Specifically, in this Amendment, the paragraph beginning on page 7, line 25 of the specification is amended to read as follows:

“Such separate cover plates are also suitable to store data for an entrance control, i.e. for so-called ‘Access-Control.’ Such a cover plate can accordingly be provided for instance with a ski pass or any other signal in order to allow access to any institution. Obviously this ‘Access-Control’ member may also be arranged integrally in the tool itself.”

In addition, in an Amendment filed herein and dated November 22, 2002, the paragraph at page 8, lines 3-5 of the specification was amended to read as follows:

“A further example consists in the arranging of a so called ELT (=Emergency Localisation Transmitter) whereby by means of an emitted signal a person for instance at an emergency can be localized. The radiation-measuring device, Access-Control Circuit and ELT are illustrated schematically at 70 in Fig. 8a.”

The drawings filed on February 2, 2007 were objected to because a numeral should be given to the casing in Figs. 2 and 8b. Reconsideration of the objection is respectfully requested.

Replacement sheets for the drawing sheets on which Figs. 2 and 8b appear are enclosed herewith for the approval of the Examiner, adding the required numerals labeling the casing in Figs. 2 and 8b.
